EDUCATION

The University of Manchester

M.Sc. Data Science (First Class (2:1))

➤ (Multiple Russell Group UK Scholarship > £13,500+)

Manchester, UK

Sept 2022 – Oct 2023

University of Delhi

B.Sc. Statistics (H) (GPA- 8.98/10)

New Delhi, India

July 2019 – June 2022

WORK EXPERIENCE

RSM UK

Data Analyst (Consultant)

Sunderland, UK

Feb 2025 - Present

- Endorsed by UKRI – Innovate UK under the UK Global Talent Visa to establish and lead Troo's Data & AI department from scratch, owning the full technical roadmap, team structure, and delivery strategy.
- Evaluated AWS, Microsoft Azure, and GCP to architect Troo's AI infrastructure; selected AWS and reduced projected architecture costs by 90%. Core objectives: eliminating 10,000+ hours of manual effort through automation and integrating frontier LLMs (OpenAI, Claude, Gemini) across business-critical workflows.
- Built a serverless AWS data platform — S3 (data lake), Glue (ETL orchestration), Athena (SQL querying), SageMaker (ML development), QuickSight (real-time BI dashboards) — integrated end-to-end with Claude, OpenAI, and Gemini APIs for internal AI products and automation. Designed an API-first integration layer connecting HubSpot CRM to internal systems, automating workflows and reducing manual overhead across five departments: Admin & Pricing, Finance, Customer Service, Sales, and Marketing.
- Managed a cross-functional team across software, data, product, sales, and cloud roles; initiated strategic partnerships with Noventiq and AWS. Speaker and panellist at Big Data Conference Europe (Vilnius, 2025) and Tech Summit London (2025) on AI automation for lean teams.

RSM UK

Data Analyst (Consultant)

Manchester, UK

Nov 2024 – Feb 2025

- Delivered advanced data solutions on Azure platforms, Power BI, and Alteryx, diagnosing and resolving complex data access and reporting issues to ensure seamless and accurate analytics across audit, tax, and consulting services.

Grant Thornton UK

Data Scientist (Consultant)

Manchester, UK

Oct 2023 – Sept 2024

- Implemented automation for over 5,000+ hrs of manual tasks across internal teams - Audit, resulting in savings of more than £100,000+ and reducing time and cost by 99% for the firm. Developed a Python-based RAG algorithm independently incorporating OpenAI-LLM and Azure to replace manual processes. Collaborated to automate multiple projects across multiple teams saving more than £1,500,000+ & 5000+ hrs across the firm.

Be.EV

Data Scientist – MSc Student

Manchester, UK

Jan 2023-Jun 2023

- Analysed public and private EV datasets to assess the impact of charger location proximity on utilization and identify additional influencing factors, providing future recommendations. Led a team of 4 MSc students in designing the project roadmap with The University of Manchester. Main steps including data cleaning with GIS Analysis & Modeling.

TECHNICAL SKILLS

LLM: Claude, Open AI & Gemini, **Data Architecture:** AWS (S3, Glue, Athena, Sagemaker, Lambda, QuickSight), Microsoft Azure (Fabric, ADF, AML, Power BI), **Programming:** Python, R, SQL, Git, **ML:** Regression, Classification, Clustering, Decision Trees, NLP, Generative AI, RAG, Semantic Chunking, **API:** CRUD, **Product & Leadership:** AI Products, Managing team of developers and analysts, **Process Automation:** Automation & Efficiency.
